SUMMARY

Software Engineer with deep frontend expertise in Angular/TypeScript and hands-on experience building Node.js/NestJS-backed applications. 4+ years of experience shipping reusable component libraries, leading agile cross-functional delivery, and optimizing real-time UI performance for scalable web applications.

EXPERIENCE

Anblicks Inc. | SDE-II Engg. & AI

Dec. 2024 – Present

- Lead feature development for an enterprise dealership management system, owning end-to-end delivery of customer onboarding and document workflows in Angular/TypeScript.
- Engineered an e-signature document preparation module that automated contract generation, reducing manual paperwork and accelerating customer turnaround time.
- Designed and launched a Smart CRM dashboard that consolidates daily tasks into a single actionable view, minimizing context switching across tools.
- Integrated the Angular frontend with backend APIs and services, enabling real-time dealership data synchronization and reliable document workflow state management.

WebOccult Technologies Pvt. Ltd. | Frontend Engineer

Jan. 2023 – Nov. 2024

- Architected and maintained production-grade Angular and Angular applications with TypeScript, Redux, RxJS, and component libraries, improving code reusability across products.
- Published internal and public NPM packages (e.g., angular-video-controller, @darshanpatel2608/human-body-react) that reduced duplicate implementations and standardized UI patterns.
- Collaborated with designers, product managers, and backend engineers in agile sprints to translate Figma mockups into responsive, accessible, and cross-browser compatible user interfaces.
- Improved frontend performance and maintainability through modular architecture, lazy loading, and efficient state management across React and Angular products.

PROJECTS

EatCard - Hospitality Management System | Angular, TypeScript, RxJS, Socket.IO, Electron

- Built 8+ modules of a restaurant management system, including POS and kiosk ordering systems with end-to-end order, reservation, and integrated payment flows.
- Improved Product Availability and Pricing (PAP) checks, reducing UI re-renders by 98% and API call volume by approximately 34% during live POS operations.
- Implemented real-time capabilities including infinite scrolling, protocol/SQS printing, dynamic taxation, multi-currency, internationalization (i18n), and socket-based system synchronization.
- Launched a desktop POS experience using Electron, enabling native printing integrations and improved reliability at the point of sale.

Learning Management System | Angular, Sass, TypeScript, Socket.IO, PWA

- Developed a task-based learning platform from scratch for IT training, supporting video lessons, file submissions, and multiple-choice assessments.
- Built a custom Angular video player component with advanced controls such as fast-forward and seek, reused across the platform for consistent playback behavior.
- Implemented PWA support for offline access and a responsive, cross-browser experience across desktop and mobile devices.

SKILLS

Frontend: Angular, React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Redux, RxJS, Electron

Backend / APIs: Node.js, NestJS, REST APIs, Socket.IO

UI / Styling: SASS/SCSS, TailwindCSS, Bootstrap, Angular Material, TaigaUI, QuillEditor

Tools: Git/GitHub, VS Code, WebStorm, Vite, Angular CLI

EDUCATION

Gujarat Technological University

B.Tech in Computer Engineering

June 2023

CGPA: 8.29/10

LINKS

NPM Packages: angular-video-controller, @darshanpatel2608/human-body-react
